

1 1. A brew chamber for a disposable single serve filter package, said chamber
2 comprising:

3 a receptacle having an open top configured and dimensioned to received
4 said package;

5 a frame for supporting said receptacle for pivotal movement about a first
6 axis between a vertical brew position and a forwardly inclined
7 open position;

8 a lid supported on said frame for pivotal movement about a second axis
9 between a raised position allowing access to said open top when
10 said receptacle is in said open position, and a lowered position
11 closing said open top when said receptacle is in said brew position;
12 and

13 linkage means for connecting said receptacle to said lid and for pivoting
14 said receptacle between said brew and open positions in response
15 to movement of said lid between said lowered and raised positions.

1 2. The brew chamber of claim 1 wherein said first and second axes are parallel.

1 3. The brew chamber of claim 1 wherein said linkage means includes a lever fixed at
2 one end to said lid and slidably connected at its opposite end in a contoured slot in said
3 receptacle.

- 1 4. The brew chamber of claim 2 wherein said linkage means further comprises a
- 2 handle connected to said lid for pivotal movement about a third axis parallel to said first and
- 3 second axes.
